

Robert M. Siminski

Professional Experience

Mr. Siminski's legal practice concentrates on obtaining, enforcing and licensing patents, trademarks and copyrights primarily in the chemical and mechanical arts. In addition, he provides litigation support, due diligence, intellectual property portfolio analyses, strategic counseling, valuation support services, and opinions.

Among the hundreds of patents he has obtained for his clients, Mr. Siminski has drafted and prosecuted chemical patents relating to adhesives, coatings, conductive materials, films, foams, nanotechnology, pharmaceuticals and small molecules. On the mechanical side, he has obtained patents relating to medical devices, athletic equipment, fastening systems, games and toys, tools, microvalves, and oil and natural gas exploration and extraction and sealing technologies.

Prior to practicing law, he was an analytical chemist in the oil/natural gas industry. During that time, he conducted analysis on soil and water for environmental contamination, directed tests on fuel recovery and designed a fuel recovery system. Outside the office, he is an active lecturer, community volunteer, coach and golfer.
