

LEANNE M. RAKERS

PRINCIPAL / ST. LOUIS METRO OFFICE

Clients around the world appreciate Leanne's uniquely creative skills in identifying patentable technologies and drafting "outside the box" patent applications, particularly at a time when courts are limiting patent eligibility. Her practice also includes IP portfolio strategy and management, client counseling, freedom-to-practice opinions and due-diligence assessments. Leanne also provides FDA regulatory counsel including patent-drug FDA advice, Patent Term Extension applications and Orange Book assessments.

Leanne's technical prowess is a rare blend that ranges from chemistry to biotechnology. As a leader in the firm's Chemical and BioPharma practice groups, her client portfolio includes large and small pharmaceutical, cosmetic, life science, chemical and biotechnology companies. More specifically, clients come to Leanne to protect a wide-range of innovations, including small molecule chemistry, biologics, anti-aging technology and formulations, therapeutic methods and formulations, organometallic chemistry and recombinant DNA technologies.

BACKGROUND

Prior to practicing law, Leanne studied cell cycle inhibitors and suppressors of cytokine signaling at Pennsylvania State University and GlaxoSmithKline Pharmaceuticals. She subsequently focused on recombinant protein expression at Sigma-Aldrich Corporation, and is a co-inventor of U.S. Patent No. 6,902,914 (Recombinant DNA Processes Using A dNTP Mixture Containing Modified Nucleotides).

An invited speaker in the U.S. and abroad, Leanne educates both clients and colleagues on the nuances of patent prosecution and enforcement strategies. Her passion for the America Invents Act (AIA) has spawned many presentations across the U.S., Europe and Japan.

Overall, her clients profess that Leanne consistently delivers *poignant legal counsel, workable solutions and excellent work product delivered in a timely manner.*
